ABOUT ME

I'm a Full Stack Developer with hands-on experience building real-world applications, scalable backend systems, and AI-integrated solutions. Strong in JavaScript, Python, and modern development frameworks, I focus on developing end-to-end systems with clean architecture, efficient APIs, and practical problem-solving.

EDUCATION

Silver Oak University | 2024-Present

Bachelor Of Computer Application (BCA)

Focus: Full Stack Development (MERN), Backend APIs, AI Integration, and Web Security

TECHNICAL SKILLS

- Core Stack : JavaScript, React.js, Next.js, Node.js, Express.js, MongoDB, RESTful APIs.
- Backend : API Development, Authentication & Authorization, Middleware Design, FastAPI, Secure Backend Practices.
- Frontend : React.js, Next.js, Responsive UI, Component-Based Architecture.
- Tools & Platforms : Git, GitHub, Postman, Docker, Render, Vercel, VS Code.
- Other : Debugging, Performance Optimization, Basic Penetration Testing, Documentation.

PROJECTS

- Portfolio Website :- Built a full-stack portfolio with Next/JS & Node.js backend, integrated Groq AI API for dynamic interaction.
- Cyber Dashboard :- Developed using FastAPI, React.js & MongoDB; streams and analyzes system logs, displaying simplified security indicators.
- Secure Dev :- Implemented secure backend practices with input validation, focusing on preventing common vulnerabilities (XSS, injections).
- Kisan Saathi :- Built an AI-powered agriculture platform for soil analysis and crop insights with multilingual report generation using AI APIs.
- Penetration Testing :- Conducted security testing using Burp Suite on Duck Store web app and documented identified vulnerabilities in detail.

SKILLS

- Python
- React.js, Next.js
- JavaScript, Node.js
- MongoDB
- Postman
- Docker
- REST API Development
- Backend Development
- Markdown Documentation
- Analytical Thinking
- Problem Solving
- Adaptability
